OLD BUSINESS

UPDATE ON SMIC LOAN: Mr. Kisscorni stated that the last of four payments for a $1 million loan to the Southwest Michigan Innovation Center was made this year. Mr. Miller indicated that he was recently copied on a communication from Dr. Bailey which provided a one-page analysis of the economic impact of the companies in the Innovation Center. He will ask for Dr. Bailey’s permission to share that with the board, and then would like it to be sent to the City Commission. It provides a compelling statement as to what the loan has done.

COMMUNICATIONS & ANNOUNCEMENTS

UPDATE ON SMIC: Ms. Cochrane reported that there were 88 employees working in the center in July, not including numerous contractors and on-call personnel. Actives International will be leaving the center because they are doing so well that a new facility has been built for them in New Jersey and they have been called back there. Their lab space has already been re-rented to another company. The other companies are all doing well and none of them are in danger of failing at this point. Two new companies are considering locating in the center. If they do, the center will be completely full.

UPDATE ON BTR PARK ACTIVITIES: Mr. Miller stated that in addition to Tekna’s location in the park, SME will be building a 10,000 square-foot building on Tech Circle. They will begin with 16 full-time employees. The park will then have 28 companies with over 500 employees and the soccer fields will be basically all that is left to be developed.

The meeting as adjourned at 8:20 a.m.
