CITY OF KALAMAZOO EX-OFFENDER POLICY CHECKLIST

As part of the City’s commitment to reducing unacceptable poverty, encouraging rehabilitation, reducing recidivism and strengthening families in Kalamazoo, the City has updated its Purchasing Policy to ensure that firms with whom the City does business share in this commitment by utilizing hiring practices that do not unfairly deny people with arrest and conviction records gainful employment. (Important: This requirement also extends to any subcontractors the bidder intends to use to fulfill the contract for goods or services being sought from the City.)

Part I: Proof that the bidder does not inquire about an individual’s past arrest or criminal history on the bidder’s employment application form

☐ Attach a copy of the current application for employment being used by the bidder

Part II: Certification that the bidder does not use an individual’s past arrest or criminal history to unlawfully discriminate against them by checking one or more of the following:

☐ That pursuant to federal or state law bidder is precluded from hiring persons with certain criminal records from holding particular positions or engaging in certain occupations by providing a cite to the applicable statute or regulation; if checking this box, provide a citation to the applicable statute or rule upon which the bidder is relying: __________________________

☐ That bidder conducts criminal history background checks only as necessary, and only after making a conditional offer of employment; that any withdrawal of an offer of employment to an individual because of a past criminal history is job-related and consistent with business necessity after the individual has been provided an individualized assessment opportunity to review and challenge or supplement the history of past criminal conduct being relied upon by the bidder;

☐ That the use by bidder of criminal history background checks complies with the U.S. Equal Employment Opportunity Commission’s Enforcement Guidance on the Consideration of Arrest and Conviction Records in Employment Decisions and that the bidder has not had a determination rendered against it in past 7 years that it discriminated against a person through the use of an individual’s arrest or criminal history

I CERTIFY THAT THE ABOVE STATEMENTS ARE TRUE.

LOCAL PREFERENCE POLICY AND CERTIFICATION

The lowest responsive Kalamazoo County bidder whose bid is not low but falls within 2% of the lowest responsive bid is afforded the opportunity to become the successful bidder if it agrees to reduce its bid to match the lowest responsive bid. The City of Kalamazoo is the sole determiner whether a bidder is responsible, qualifies as a Kalamazoo County bidder, and if its bid is responsive to the City’s specifications, terms and conditions.

If the lowest Kalamazoo County bidder chooses not to match the lowest bid, the next lowest responsive Kalamazoo County bidder whose bid falls within 2% of the lowest bid, is given the opportunity to match the lowest responsive bid.

To qualify as a Kalamazoo County bidder, the bidder must meet both the following criteria:

1. Have a physical presence in Kalamazoo County by maintaining a permanent office, factory or other facility in Kalamazoo County with employees working in Kalamazoo County.

2. Have paid real or personal property taxes related to said business to the City of Kalamazoo, County of Kalamazoo or other municipal corporation within Kalamazoo County in the previous tax year, except that a non-profit entity need not meet this requirement.

This local preference policy applies only to purchases for materials, supplies, capital outlay, and services for maintenance, repair or operation of City facilities that are over $25,000. If more than 50% of the contract is subcontracted to firms located outside of Kalamazoo County that bid does not qualify for the local preference policy outlined above. The local preference policy will not apply if prohibited by law. The Purchasing Agent has the authority to finally determine if the bidder qualifies as a Kalamazoo County bidder as set forth herein. The Purchasing Agent may take into account the permanency of the business in Kalamazoo, and whether the business appears to be claiming to be a Kalamazoo County business solely or primarily to qualify as a Kalamazoo County business under this Resolution, and any other material factors.

CERTIFICATION

It is understood and agreed that by naming the City of Kalamazoo as additional insured, coverage afforded is considered to be primary and any other insurance the City of Kalamazoo may have in effect shall be considered secondary and/or excess.

To the fullest extent permitted by law the Contractor agrees to defend, pay on behalf of, indemnify, and hold harmless the City of Kalamazoo, its elected and appointed officials, employees, agents and volunteers, and others working on behalf of the City of Kalamazoo against any and all claims, demands, suits, or loss, including all costs connected therewith, and for any damages which may be asserted, claimed, or recovered against or from the City of Kalamazoo, by reason of personal injury, including bodily injury or death and/or property damage, including loss of use thereof, which arises out of, or is in any way connected or associated with this contract.

If any of the above coverages expire during the term of this contract, the Contractor shall deliver renewal certificates and/or policies to City of Kalamazoo at least ten (10) days prior to the expiration date.

Scope of Coverage: The above requirements and conditions shall not be interpreted to limit the liability of the Contractor under this Contract, but shall be interpreted to provide the greatest benefit to the City and its officers and employees. The above listed coverages shall protect the Contractor, its employees, agents, representatives and subcontractors against claims arising out of the work performed. It shall be the Contractor’s responsibility to provide similar insurance for each subcontractor or to provide evidence that each subcontractor carries such insurance in like amount prior to the time such subcontractor proceeds to perform under the contract.
SECTION IV
SPECIAL CONDITIONS

1. INTENT

It is the intent of these plans and specifications to provide for a general contractor who shall provide all labor, materials, tools and equipment necessary to perform in a professional manner for the Spray Patching Pothole Project as described in the specifications and bid document.

2. SCOPE OF WORK

The scope of work for this project shall consist of patching potholes and patches using spray patching technology in the roads indicated within this bid document. Spray patching technology uses four steps to achieve durable, permanent, pothole repair: 1) Clean – use high volume low pressure air (with mechanical methods as necessary) to clean the patch of debris, 2) Tack – prep the patch with a coating of emulsion, 3) Fill – inject emulsion coated aggregate and fill pothole, and 4) Compact – achieve density on the patch and open to traffic. The Contractor shall use quality material for both the aggregate and emulsion. The contract and work shall be carried out in conformance with the equipment manufacturer’s recommendations, MDOT Standard Specifications for Construction, special provisions included in the contract documentation, and Ordinances of the City of Kalamazoo in effect on the date of invitation for bids.

The City of Kalamazoo has specified $43,000 for spray patching within the city limits. Spray patching shall take place at the per ton price (as bid) up to the 80% completion mark of the amount (tonnage) specified by the department. At the 80% completion mark the Contractor shall cease patching operations and notify the City they have reached 80% completion. The City will then direct the Contractor to any remaining high priority patching areas until 100% completion of allocated patching is completed.

- Formula for determining 80% completion mark:

  \[
  \frac{1}{\text{\$bid price/ton}} \times \$43,000 \times 0.8 = 80\% \text{ COMPLETION TONNAGE}
  \]

Proposed sections of roads to be spray patched are listed in Attachment A and are given in the priority ranking. Order and selection of roads to be spray patched shall be as directed by the Program Manager.

All necessary traffic control, labor, materials, tools, equipment, and other items incidental to the work being performed shall be included in the Contractor’s unit price for this contract. Such items will not be bid or paid for separately but shall be included in the overall unit price.

The bidder shall furnish all labor, supervision, supplies, tools, equipment, and other means necessary or proper for performing and completing the work. The bidder shall be responsible for the cleaning up of the job site and shall repair or restore all structures and property that may be damaged or disturbed during performance of the work to the satisfaction of the Public Services Department for the City of Kalamazoo. Drainage structure covers shall be salvaged and reused if in usable condition; otherwise they shall be replaced. Where needed, all traffic control used for such operations as defined by the MMUTCD will be the responsibility of the bidder.

The bidder shall have all work completed by October 31, 2021.
3. **UNIT PRICING**

The unit price, including its pro-rata share of overhead, multiplied by the quantity shown shall represent the total bid and shall be held firm for the life of this contract. Any bid not conforming to this requirement may be rejected as non-responsive.

4. **TEMPORARY UTILITIES**

4.1 Temporary or construction water will NOT be available on the sites. The Contractor must provide for drinking water.

4.2 Temporary toilets: To be supplied by the Contractor as may be necessary.

5. **PROGRESS SCHEDULE**

5.1 After receipt of notification by Contractor of Notice to Proceed work shall start no earlier than **July 31, 2021**.

5.2 **Project shall have a final completion date of October 31, 2021.**

5.3 Work of a similar nature may be added to this contract if agreed to by the City and the Contractor. In the event that work is added, the progress schedule for the existing work will remain unchanged. Any contract time added for additional work will be applied to that additional work only and cannot be added to items in the original contract. Any work done on the items in the original contract past the number of working days stated herein will be subject to liquidated damages regardless of any work that may be added at a later date.

5.4 The Contractor will be required to meet with the Public Services representatives to work out a detailed progress schedule. The schedule for this meeting will be within two weeks after contract award has been made.

5.5 The named sub-contractor(s) for all items shall also be present at the scheduled meeting and they will be required to sign the Progress Schedule to indicate their approval of the scheduled dates of work set forth in the Progress Schedule.

5.6 The Progress Schedule shall include, as a minimum, the starting and completion dates for major items, and where specified in the bid document the date the project is to be opened to traffic as well as the final project completion date specified in the bid document. The Progress Schedule shall be coordinated with all aspects of the work occurring at the site.

5.7 Failure on the part of the Contractor to carry out the provisions of the Progress Schedule as established may be considered sufficient cause to prevent bidding future projects until a satisfactory rate of progress is again established.

5.8 The starting date and the contract time to the completion date for this project may be adjusted by Public Services without imposing liquidated damages upon the receipt of satisfactory documented evidence that unforeseen delayed delivery of critical materials will prevent the orderly prosecution of the work.

5.9 Section 501.03.I.2, Seasonal Limitations, is amended as follows: Seasonal limits for placing HMA mixtures in the City of Kalamazoo will be April 1 to November 1. No HMA paving will be allowed outside of these dates unless approved by the Engineer.
6. **LIQUIDATED DAMAGES**

Liquidated Damages will be assessed per Section 108.10C of the 2012 MDOT Standard Specifications for Construction.

7. **MAINTAINING TRAFFIC**

7.1 This work shall be in accordance with the requirements of Section 812 of the MDOT Standard Specifications for Construction, the Maintaining Traffic special provision, and as specified herein. The Contractor is advised that the current Michigan Manual of Uniform Traffic Control Devices (MMUTCD) is hereby established as governing all work in connection with traffic control devices, barricade lighting, etc. required on this project.

7.2 The Contractor shall furnish, erect, maintain and, upon completion of the work, remove all traffic control devices and barricade lights within the project and around the perimeter of the project for the safety and protection of through and local traffic. This includes, but is not limited to: Advance, regulatory and warning signs; barricades and channeling devices at intersecting streets on which traffic is to be maintained; barricades at the ends of the project and at right-of-way lines for intersecting streets which are to be closed with the first usable street on each side of the project. Traffic regulators, where required by the Engineer, are included.

7.3 Where the existing pavement or partial widths of new pavement are to be utilized for the maintenance of through and local traffic, channelizing devices will be required at 50’ intervals or as directed by the Engineer for channeling and directing traffic through the construction area.

7.4 Through traffic shall be maintained utilizing sidewalk closures with detours and traffic shifts per MDOT traffic and safety details.

7.5 Protection of all pedestrian traffic shall be maintained at all times in accordance with the MMUTCD. Type II barricades and sidewalk detour signs shall be used in accordance with the MMUTCD.

7.6 Payment for furnishing and operating all temporary traffic control devices and traffic regulators shall be paid as pay items included in this contract and shall include all the temporary traffic control measures on all road segments.

The machine shall be capable of a thoroughly mixed product on a continuous basis. The machine shall be capable of thoroughly blending all the ingredients together. The machine shall be a self-contained unit with a truck mount hopper feed for the aggregate, as to eliminate the liabilities associated with hoist or dump style unloading. The hopper unit shall also incorporate a pressure or forced feed to facilitate even dispersion of the aggregate.
3. Steel-wheeled roller compaction equipment to achieve density acceptable to the City.
CONSTRUCTION

Prior to applying any requested spray patch, Contractor shall cover all manholes, inlets, and valve boxes. Contractor shall also clear all dirt, debris, and deleterious material from existing pavement prior to applying the requested spray patch.

Potholes, alligator cracks or other surface defects that are contiguous with cracks are considered to be ‘crack related’ and are to be repaired by spray patching. If there are questions about where to spray patch on the street, consult the Engineer. There may be street segments, which are not labeled, but shall be spray patched at the discretion of the Engineer.

Work shall not be performed when the atmospheric temperature is below 36° Fahrenheit.

All loose and objectionable material shall be removed from the open crack and surrounding area by blowing with high pressure air streams or other means acceptable by the Engineer.

Cleaned cracks shall be sprayed with the emulsified asphalt, or tack coat and sprayed with the approved patching material. Some over-spraying of the crack will be required to ensure a smooth transition between the repaired areas and the adjacent undisturbed pavement surface. The repaired area shall be compacted, if necessary, to ensure adequate embedment of the patch mixture into and over the repaired area. All loose aggregate and debris shall be swept or removed from the pavement surface and disposed of to the satisfaction of the Engineer, prior to spray patching.

After application of the proposed spray patch, all materials used to cover manholes, inlets and valve boxes shall be removed and disposed of off the site by the Contractor.

All loose aggregate and debris shall be swept or removed from the pavement surface and disposed of to the satisfaction of the City no later than 24 hours after patching of roadway.

MEASUREMENT AND PAYMENT

The completed work as measured for Spay Patching shall be measured by the tonnage of coated aggregate placed. Spray Patching shall be paid for at the Contractors bid price. Price shall include furnishing, unloading, hauling, and for applying the spray patching and for all labor, tools, equipment, and incidental necessary to complete the work as provided in the contract.
