Subject: Procurement Recommendation
Interceptor Odor Mitigation Passive Carbon Filter
Wager Company 2050-1350 Series

It is recommended that the Purchasing Agent approve a Requisition for Purchase Order issuance to Robert H Wager Company, Inc in the quoted of \$37,400.00 for the direct procurement of a Wager 2050-1350 Vent Scrubber 2050FAP-1350. Shipping has been estimated based on recent sales by the Vendor.

The Wager 2050-1350 is a fabricated aluminum plate passive air flow treatment unit for hydrogen sulfide gas mitigation which houses and is supplied with 27 individual containers filled with 1.5 cubic feet of dry-scrubbing media each. The fabricated unit incorporates a built-in water separator and mist eliminator and is supplied with the mist eliminator mesh pads. Operationally, the fabricated unit contains 16 air admittance valves for the vacuum release utilizing outside fresh air. Wager is the only known manufacturer which combines these features into a single unit. Wager is also the sole source of Wager products.
